### Applications & Areas

- Internal & External Walls
- Cavity Walls
- Partition Walls
- Best suited for Air conditioned buildings
- Fire rated applications & Insulated buildings

### Why use Aerocon AAC Blocks?

1. Energy Saving and Eco-Friendly; helps reduce carbon foot print
  - Manufactured from recycled material with zero wastage
  - Quicken up construction by up to 30%
2. Dimensionally accurate & easy workability
  - Factory finished with superb surface finish; easily accepts renders & plasters
  - Use of standard tools to cut, saw, chisel, drill & shape
3. Unmatched Properties
  - Super lightweight; 1/3rd the density of clay bricks
  - Non-combustible with superior fire resistance
  - Exceptional thermal & acoustic insulation
  - No cavity construction; eliminates termites, rodents, pests & fungal growth
4. Guaranteed Savings\*
  - Reduces foundation load of the building up to 30%
  - Reduces power consumption by 27%
  - Steel & Cement savings by 18% & 12% respectively

## Why Choose Us

When we think of a door, we think of wood and the craftsman who would create it. In a market served by traditional flush doors, Mikasa Doors & Frames introduces a revolutionary concept. It offers factory finished door sets to suit room and purpose.

Mikasa Doors & Frames can also be supplied as an integrated performance doorset. All the components - door leaf, frame and architectural ironmongery work together as a unified product, meeting certified performance levels. The doors and frames are carefully selected and tested to provide a coordinated, fit for purpose, certified package, offering comprehensive product performance and life cycle resilience.
